Mr. Trey Cash
Vice President
Greene and Lenoir County Economic Development
NC Global TransPark Economic Development Region

Dear Mr. Trey Cash,

Thank You for your inquiry regarding natural gas service for 0 Burnette Rd, Farmville, NC. Piedmont Natural Gas currently maintains an 8-inch transmission pressure gas line that could potentially serve a prospective client. This line crosses Burnette Rd, on the north end. We appreciate the opportunity to work with new businesses and industries considering relocation or expansion within our service territory.

Our staff is prepared to confidentially assist you in your review and evaluation of natural gas service availability in our territory. Please note, the capability to provide natural gas service to any site or customer(s) on our system will require an engineering analysis that is based on the specific needs of each individual customer(s). As such, the absence of a natural gas line near a particular site does not necessarily mean that Piedmont is unable to serve that site. On the other hand, a gas line located near a particular site does not necessarily mean that service is readily available to that site without additional infrastructure and/or investment.

In order to conduct a thorough engineering analysis, Piedmont will need the prospective customer to provide the following:

1. Total connected gas load
2. Projected usage profile
3. Required delivery pressure
4. Projected alternate fuel capabilities, if any
5. Desired level of service (firm or interruptible; sales or transportation)

Upon receipt of this information, Piedmont will perform an engineering analysis, prepare a construction cost estimate, if applicable, for the infrastructure and/or system upgrade(s) required to provide the requested level of service and conduct an economic feasibility evaluation. The results of these studies will then be presented to the customer in the form of a proposal to provide service. Our staff is available to answer any questions you may have regarding this evaluation process.

Again, we thank you for your interest in Piedmont Natural Gas and look forward to working with you to promote economic development in our region by striving to meet the energy needs of our customers.

Sincerely

Mike Weston
